

REQUEST FOR ACTION (RFA) FORM

GLAST LAT Project
ISOC Peer Review
March 2, 2004

Action Item # 07

Presentation Section/Subject Area: ISOC Reports

SPECIFIC REQUEST:

Between now and ISOC CDR, the team needs to better define and document the types of reports that will be generated by the ISOC for both internal use and for use by external systems (like the MOC and GSSC). Reports would seem to include those needed to document instrument performance, status, & analysis (probably covered in an MOA), and those needed to report status, quality, etc. of data processing/transmission (covered in the Data Products ICD's). Also be sure to address reports you expect to get from the GSSC and MOC and if they are read by people or processed by software.
